I have lived in New York State most of my life, the last ten in the Finger Lakes area.

I remember what happened in the Love Canal area near Niagara Falls in the late 70's from toxic waste dumping. Hydrofracking is no less devastating to our health, safety, and children's future. I hope to someday raise my children in this uniquely beautiful region, with waterfalls, parks, and clean places to play.

Listen to responsible scientists and health experts who understand that economic progress can't come at the expense of our children's lives.

I understand that my comments will be submitted to the Department of Environmental Conservation as an official public comment in response to the NYS Department of Environmental Conservation's draft Supplemental General Environmental Impact Statement regulating the use of hydrofracturing in the natural gas-drilling process.
